NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

Vision of the Department

• Creating eminent and ethical leaders in the domain of Computational Sciences through quality professional education with a focus on holistic learning and excellence.

Mission of the Department

- To create technically competent and ethically conscious graduates in the field of Computer Science and Engineering by encouraging holistic learning and excellence.
- To prepare students for careers in Industry, Academia and the Government.
- To instill Entrepreneurial Orientation and research motivation among the students of the department.
- To emerge as a leader in education in the region by encouraging teaching, learning, industry and societal connect.

A CENTRE OF EXCELLENCE IN SCIENCE & TECHNOLOGY BY THE CATHOLIC ARCHDIOCESE OF TRICHUR

JYOTHI HILLS, VETTIKATTIRI P.O, CHERUTHURUTHY, THRISSUR. PIN-679531 PH: +91-4884-259000, 274423 FAX: 04884-274777

NBA accredited B.Tech Programmes in Computer Science & Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Mechanical Engineering valid for the academic years 2016-2022. NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

Abstract

- 1. Bhavas classification using deep learning is used to classify 'navarasams' of classical dance such as 'Sringara'(Love), 'Hasya'(Comic), 'Karuna'(Compassion), 'Raudra'(Anger), 'Veera'(Valor), 'Bhayankara'(Fear), 'BhiBhatsa'(Disgust), 'Adbhuta'(Wonder), 'Shanta'(Tranquility)
- 2. Technology of deep learning to classify bhavas
- 3. Steps:
 - i. Identify the dataset
 - ii. Data pre-processing
 - iii. Feature extraction
 - iv. Identification and classification
 - v. Trained and tested
 - vi. Accuracy calculation

JYOTHI HILLS, VETTIKATTIRI P.O., CHERUTHURUTHY, THRISSUR, PIN-679531 PH: +91-4884-259000, 274423 FAX: 04884-274777

NBA accredited B.Tech Programmes in Computer Science & Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Mechanical Engineering valid for the academic years 2016-2022. NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

Existing system

- Convolutional Neural Network(CNN) is used to identify 6 elementary emotions
 - Happy
 - Sad 11
 - Fear 111
 - Anger 1V.
 - Surprise
 - Disgust V1.
- Classification is done through simple image processing
- 3. Different types of layers are present
 - Input layer
 - Convolution layer 11.
 - Activation layer 111.

JYOTHI HILLS, VETTIKATTIRI P.O., CHERUTHURUTHY, THRISSUR, PIN-679531 PH: +91-4884-259000, 274423 FAX: 04884-274777

- iv) Pooling layer
 - Mean pooling a.
 - b. Max pooling
- Fully connected layer V)
- Softmax layer V1)
- 4. Accuracy of 91.6 % has been achieved by the test result

JYOTHI HILLS, VETTIKATTIRI P.O, CHERUTHURUTHY, THRISSUR. PIN-679531 PH: +91-4884-259000, 274423 FAX: 04884-274777

NBA accredited B.Tech Programmes in Computer Science & Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Mechanical Engineering valid for the academic years 2016-2022. NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

Advantages & Disadvantages

1. Advantages

- i. High accuracy
- ii. Automatic extraction of features

2. <u>Disadvantages</u>

- i. Classifies input images to atmost 7 facial expressions
- ii. Less accuracy for disgust and surprise expressions

Max pooling by pooling layer Classification by softmax layer into the 6 basic classification 	 An accuracy of 65.1 %. CNN architectur e and CNN parameter training explained. 	CNN architecture can be used in our project	Distortion of image is high

JYOTHI HILLS, VETTIKATTIRI P.O, CHERUTHURUTHY, THRISSUR. PIN-679531 PH: +91-4884-259000, 274423 FAX: 04884-274777

NBA accredited B.Tech Programmes in Computer Science & Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Mechanical Engineering valid for the academic years 2016-2022. NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

Proposed system

- 1. Application to identify the bhavas from the given input facial image
- 2. Using CNN architecture and appropriate dataset we can train the system to classify them to bhavas
- 3. This application allows the normal users (Other than dancers) to easily understand the bhavas.

JYOTHI HILLS, VETTIKATTIRI P.O, CHERUTHURUTHY, THRISSUR. PIN-679531 PH: +91-4884-259000, 274423 FAX: 04884-274777

NBA accredited B.Tech Programmes in Computer Science & Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Mechanical Engineering valid for the academic years 2016-2022. NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

Features of the proposed system

- 1. The first CNNs are used to segment eye, lips and the cheeks regions from facial images because of the importance of these regions to recognize the bhavas
- 2. Using the first CNN outputs, the proposed system forms a face-iconized image that is used by the fourth CNN as input
- 3. Every image block is classified as eye, lips and the cheeks versus background
- 4. Then the training masks are generated by detecting and localizing facial landmarks on a face image
- 5. Training masks are used for determining majority and mixed classes in the facial component segmentation step
- 6. Softmax layer is used for classification and images are classified into bhavas

JYOTHI HILLS, VETTIKATTIRI P.O, CHERUTHURUTHY, THRISSUR. PIN-679531 PH: +91-4884-259000, 274423 FAX: 04884-274777

NBA accredited B.Tech Programmes in Computer Science & Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Mechanical Engineering valid for the academic years 2016-2022. NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

Modules of proposed system

1. Data Pre-processing -

- → firstly normalizing data per image and then normalizing data per pixel
- → Normalizing data per image:
 - Subtract from each image the mean value over that image
 - Set appropriate value for the standard deviation of the image
- → Normalizing data per pixel:
 - Compute the mean image over the training set
 - For each training image, subtract from each pixel its mean value
 - Set the standard deviation of each pixel over all training images

JYOTHI HILLS, VETTIKATTIRI P.O, CHERUTHURUTHY, THRISSUR. PIN-679531 PH: +91-4884-259000, 274423 FAX: 04884-274777

NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

2. Feature Extraction -

- → The extraction of facial features requires translating the input data into a set of features
- → Features included in this project are eyes, lips and cheeks
- → First three CNNs are trained to segment eyebrow, eye and mouth regions from facial image
- → Every image block is classified as eye, lips and the cheeks versus background
- → The training masks are generated by detecting and localizing facial landmarks on a face image
- → Training masks are used for determining majority and mixed classes in the facial component segmentation step

JYOTHI HILLS, VETTIKATTIRI P.O, CHERUTHURUTHY, THRISSUR. PIN-679531 PH: +91-4884-259000, 274423 FAX: 04884-274777

NBA accredited B.Tech Programmes in Computer Science & Engineering, Electronics & Communication Engineering, Electronics Engineering and Mechanical Engineering valid for the academic years 2016-2022. NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

3. Identification and Classification -

- → Softmax layer is used for classification
- → Classify image to bhavas

JYOTHI HILLS, VETTIKATTIRI P.O, CHERUTHURUTHY, THRISSUR. PIN-679531 PH: +91-4884-259000. 274423 FAX: 04884-274777

NBA accredited B.Tech Programmes in Computer Science & Engineering, Electronics & Communication Engineering, Electronics Engineering and Mechanical Engineering valid for the academic years 2016-2022. NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

SRS

Functional Requirement	Non Functional Requirement
The system should classify an image into one of 9 emotions	The system should be implemented in jupyter notebook
The system should include an automatic face detection algorithm

Course Outcomes

- 1. C410.1 The students will be able to analyse a current topic of professional interest and present it before an audience
- 2. C410.2 Students will be able to identify an engineering problem, analyse it and propose a work plan to solve it
- 3. C410.3 Students will have gained thorough knowledge in design, implementations and execution of Computer science related projects
- 4. C410.4 Students will have attained the practical knowledge of what they learned in theory subjects
- 5. C410.5 Students will become familiar with usage of modern tools
- 6. C410.6 Students will have ability to plan and work in a team

Conclusion

- 1. CNN algorithm is used for facial feature extraction and emotion classification
- 2. Automatically extracts features rather than manual extraction
- 3. Identifies and classifies the facial expression into corresponding 'bhava'
- 4. Helps non trained dancers easily to identify each of the bhavas
